PROFILE SUMMARY

Computer Science graduate with hands-on experience in Software Development and Machine Learning. Proficient in Python, JavaScript, React.js, Flask, SQL, HTML, CSS, and REST APIs, with experience developing web applications and predictive machine learning models using Scikit-learn. Strong foundation in Data Structures, OOP, DBMS, and SDLC. Seeking an entry-level Software Developer or AI/ML Engineer role.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, C++, SQL

Frontend: HTML5, CSS3, Responsive Web Design

AI/ML: Data Preprocessing, Data Analysis, Model Training, Model Evaluation, Scikit-learn, Pandas, NumPy, Matplotlib

Databases: SQLite, MySQL

Tools: Git, GitHub, VS Code, Jupyter Notebook, Postman

Core Concepts : OOP, DBMS, SDLC, Data Structures & Algorithms (Basics)

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya , Indore - 2022-2026

Bachelor of Technology, Computer Science and Engineering | CGPA - 7.7

Class XII (Senior Secondary) | Percentage - 79%

Class X (Secondary) | Percentage - 75%

INTERNSHIP EXPERIENCE

AI Virtual Intern

- Worked with structured datasets and maintained accurate project records.
- Performed data preprocessing, validation, and analysis tasks.
- Documented workflows, results, and project observations.
- Collaborated on AI-related activities requiring organization and attention to detail.

PROJECT

Rethrifty — Web-Based Marketplace Platform

Technologies: Python, SQLite, HTML, CSS, JavaScript, Git, GitHub

- Contributed to the development of a web-based marketplace platform for buying and selling second-hand products.
- Designed and managed an SQLite database to store and organize user and product information.
- Implemented CRUD (Create, Read, Update, Delete) operations for efficient data management.
- Used Git and GitHub for version control and collaborative project development.

Used Car Price Prediction

Technologies: Python, Scikit-learn, Gradient Boosting, Pandas, NumPy

- Developed a machine learning model to predict used car prices using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) on real-world datasets.
- Trained and evaluated a Gradient Boosting Regressor to improve prediction accuracy.
- Optimized model performance by selecting relevant features and evaluating results using regression metrics.

CERTIFICATIONS

- Artificial Intelligence — IBMCEP (2026)
- Cloud Computing & Distributed Systems — NPTEL (2025)
- Enhancing Soft Skills & Personality — NPTEL (2024)
- C & C++ OOPS — Universal Informatics (2023)
